Improvements finished on ViaSat worker lounge

Prevost Construction has completed tenant improvements for The Roast House at ViaSat's corporate headquarters in Carlsbad.

The new venue, which features environmentally-sensitive interior finishes, was built to create a balance between work and relaxation for its 1,200 employees in ViaSat's eight-building Carlsbad campus.

The company hired Prevost for the project, which included the exterior landscape renovation, remodel and conversion of two conference rooms to create The Roast House employee lounge.

Kristineh Hiatt was the project manager with Prevost and Tom Kingsley was the superintendent. Jamie Prevost is president of the contractor. Gerard Tanksley was project manager for ViaSat.

The Roast House was designed by San Diego-based Ferguson Pape Baldwin Architects, with Laura Lisauskas as job captain.

Subcontractors included Suncoast Drywall, National Electric Works, Spartan Plumbing, Green Mechanical, General Coatings, Foreman Tile and Mission Valley Cabinets.

ViaSat is a designer and producer of advanced digital communications products that enable fast, secure and efficient

communications to any location for commercial and government applications. The Roast House is the latest in a

series of campus improvement projects ViaSat has completed. Other campus amenities include a workout room with

lockers and showers, a basketball court and volleyball courts.
